

Database:

For this website we have 3 different tables in the cookies database name. The different tables are for the events, users, and linking the events and users.

The events have 6 columns. The columns consists of the eventid which is an int and is the primary key. There is event names, location, time, date, and description for each event. These are all characters. The constraint for each description is 250 chars. The other columns are also chars with a constraint of 60.
